

And the installation is simple.

- Move your old front tire and tube to the new hub motor wheel and mount on your bike.
- Slide the thumb throttle onto the handlebar.
- Clamp the controller onto the frame.
- Attach the rack (no need to remove the axle bolts).
- Slip on the trunk.
- Run the battery wire from the controller to the trunk.
- Tie-wrap the motor wires onto the fork and the battery wire on the frame.
- Switch it on and go!
